What about RTing Ethan w/ comment?

Comment: An excellent resource for developers building on the #XRP Ledger:
RT: Ethan's tweet *[New XRP Ledger Developer site! New look, new philosophy and new domain at (link: http://xrpl.org) xrpl.org. Lots more to come for those who want to #BUIDL on #xrp (link: https://xrpl.org/blog/2019/welcome-to-xrpl-org.html)]*

Subject: XRPL Developer Site Launch!
To: Leadership <████████████████@ripple.com>, Product-managers <██████████████████@ripple.com>, C++/Rippled Team <████████████@ripple.com>, <███████████@ripple.com>, Engineering <█████████████@ripple.com>, Marcomm <███████████████@ripple.com>, BD <██████@ripple.com>

Hey All -

Today, we launched xrpl.org, a new community-driven website for developers to access technical documentation, developer tools, tutorials, and network metrics for the XRP Ledger.

Blog post with more detailed information here:

https://xrpl.org/blog/2019/welcome-to-xrpl-org.html

The site is designed to replace the previous developer portal hosted under developers.ripple.com (redirect to xrpl.org is still propagating), which confused developers into thinking they were building on Ripple, not XRP Ledger.
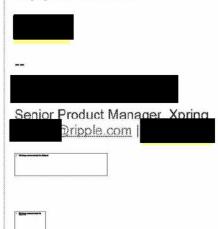

Much like XRP Ledger, xrpl.org is open source and community-driven, meaning anyone can submit a pull request with proposed changes or comments on GitHub.

We plan to see the site grow with the addition of an XRP Ledger Explorer for network metrics, new tutorials highlighting exciting new use cases and an ecosystem page showcasing the many different applications using XRP Ledger.

We appreciate everyone that contributed to the site's initial launch, including Ripple design, docs, product, ops and engineering teams, as well as a host of community contributors.

If you have any direct feedback, and don't have a GitHub account, then please let me know I can open a pull request on GitHub for you.

Enjoy the weekend!
